

XUE WEI

Albany, NY

✉ xwei4@albany.edu

EDUCATION

University at Albany, State University of New York

09/2019 - present

Doctor of Philosophy - PhD, Signal Processing & Communications

NY, USA

GPA: 3.89/4.0

Xidian University

09/2016 - 07/2019

Master of Engineering, Signal and Information Processing

Shaanxi, China

GPA: 3.78/4.0

Xidian University

09/2012 - 07/2016

Bachelor of Engineering, Electrical and Computer Engineering

Shaanxi, China

GPA: 3.67/4.0

Publications

Journals

1. **Xue Wei** and Dola Saha, WISE: Waveform Independent Signal Embedding for Covert Communication, IEEE Transactions on Machine Learning in Communications and Networking.
2. Jin Liu, **Xue Wei**, Langlang Li, MR Image Segmentation Based on Level Set Method, Multimedia Tools and Applications, 79, pages 11487–11502 (2020).

Conferences

1. **Xue Wei**, Anushka Gupta, Aveek Dutta, Dola Saha and Gregory Hellbourg, RIS for Signal Cancellation in 3D, in IEEE International Symposium on Dynamic Spectrum Access Networks (DySPAN) 2024 (Under Review).
2. **Xue Wei** and Dola Saha, KNEW: Key Generation using NEural Networks from Wireless Channels, in N2Women Workshop ACM SIGCOMM 2023.
3. **Xue Wei**, Dola Saha, Gregory Hellbourg, Aveek Dutta, Multistage 2D DoA Estimation in Low SNR, in IEEE International Conference on Communications (ICC) 2023.
4. Zhibin Zou, **Xue Wei**, Dola Saha, Aveek Dutta, Gregory Hellbourg, SCISRS: Signal Cancellation using Intelligent Surfaces for Radio Astronomy Services, in 2022 IEEE Global Communications Conference (GLOBECOM).
5. **Xue Wei** and Dola Saha, KNEW: Key Generation using NEural Networks from Wireless Channels, in ACM Wireless Security and Machine Learning (WiseML) 2022.
6. Hesham Mohammed, **Xue Wei** and Dola Saha, Adversarial Learning for Hiding Wireless Signals, in 2021 IEEE Global Communications Conference (GLOBECOM).
7. Jin Liu, **Xue Wei**, Qi Li, Langlang Li, A Level Set Algorithm Based on Probabilistic Statistics for MR Image Segmentation, 2018 International Conference on Intelligence Science and Big Data Engineering, PP. 562.
8. Jin Liu, Langlang Li, Qi Li, **Xue Wei**, Collaborative Error Propagation for Single Sample Face Recognition, 2018 International Conference on Intelligence Science and Big Data Engineering, PP. 332.

Awards and Honors

ACM SIGCOMM 2023 Student Travel Grant

SIGCOMM2023

ACM WiSec2022 Student Travel Grants

Wisec2022

Presidential Fellowship Award 2021

University at Albany

Presidential Fellowship Award 2020

University at Albany

Excellent Graduate Student

Xidian University

2017 First Class Graduate Student Scholarship

Xidian University

2016 Second Class Graduate Student Scholarship

Xidian University

Research Experience

Multistage 2D DoA Estimation in Low SNR

2022 – present

Advised by: Dr. Dola Saha and Dr. Aveek Dutta

- Propose a three-stage algorithm that methodically exploits digital beamforming, creates virtual subarrays, inspects multiple options and introduces clustering to estimate the DoA in low SNRs

RFI cancellation using RIS

2022 – present

Advised by: Dr. Dola Saha and Dr. Aveek Dutta

- Estimate incident RFI of the telescope and configure Reconfigurable Intelligent Surface(number, spacing, etc.)
- Find the solution of amplitude and phase of each element of RIS to reflect incident RFI of RIS in order to cancel RFI in the telescope

Key generation

2022 – 2023

Advised by: Dr. Dola Saha

- Propose a Key Generation model using neural networks from wireless channels
- Extract the implicit features of channel in a compressed form to derive keys with high KGR and low KDR

Wireless steganography

2021 – present

Advised by: Dr. Dola Saha

- Design a complex-valued neural network, which is more powerful and has a faster learning speed than real-valued neural network, to hide the transmission of secret signals
- This method has nothing to do with any properties of the covert signal (such as waveform or modulation order)
- Transmit signals over the air and apply the transfer learning to retrain the model to further optimize the system and get a lower bit error rate

Teaching human motion

2019 – 2020

Advised by: Dr. Weifu Wang

- Offer a systematic exploration of how to decompose complicated physical motions to make motion more interpretable and easier to learn for humans
- Build a teaching environment in a virtual environment (VR + unity)
- Use real robot teaching frontend to demonstrate motion clips(sign language, breaststroke, butterfly, etc)

Medical Image Segmentation based on Level Set

2017 – 2019

Advised by: Dr. Jin Liu

- Propose an MR image segmentation algorithm based on the level set algorithm to address challenges present in medical images, such as uneven gray level distribution, strong background interference, and blurred target area

Face Recognition Methods under Complex Conditions

2017 – 2019

Advised by: Dr. Jin Liu

- Propose a cooperative representation model that integrates both global and local information to enhance the recognition accuracy of facial images under varying conditions such as changes in illumination, expressions, and occlusions in the context of single-sample face recognition

Teaching Experience

IECE 111 - Introduction to ECE, Teaching Assistant

Spring 2022

IECE 141 - Introduction to Programming, Teaching Assistant

Spring 2022

IECE 110 - Introduction to Engineering, Teaching Assistant

Fall 2021, Fall 2020

IECE 553 - Cyber-Physical Systems, Teaching Assistant

Fall 2021

IECE 371 - Signals and Systems, Teaching Assistant

Fall 2020

Responsibilities: Graded, Conducted Laboratory Classes

TECHNICAL SKILLS

Languages: C, C++, MATLAB, Python, Julia

Expertise: Wireless Communications Systems, OFDM, Machine Learning

Platforms: PyTorch, Robot Operating System (ROS)
